PERSONAL PROFILE

I am a web developer who has a lifelong passion and interest in the tech industry. I am a developer because I genuinely love learning and the scope of what can be done with programming is truly exciting. I have a strong problem solving mindset. My time at the School of Code has prepared me well for working in collaborative software development environment.

EXPERIENCE

SOFTWARE ENGINEER

School of Code |November 2021 – Present

During my time at the School of Code I learned the principals of software development . These included how to apply algorithmic thinking, working as part of a team and pair programming. We also learned how to develop software using agile principals. Additionally I learned the fundamentals of design well as the importance of UX, UI, and testing. We also regularly worked in teams and practiced pair programming to complete tasks.

PROJECTS

Music player| December 2021

I built this part way through the course as practice. It is a music sharing app where mp3 files can be uploaded to an Amazon S3 bucket. The front end is built in JavaScript using the audio API to play files. It gave me an opportunity to start using AWS.

Pin IT|January 2022

We were given a week to come up with a solution that would help to improve the lives of bootcamp members. In a group of 4 our idea was an app that would allow bootcampers to save links to articles and videos.

Final Project|Raduno|February - March 2022

In a team of 6, we were given 4 weeks to create a full stack web application. We created an app that allows a group of people to plan social events by taking polls to decide location and date. The app comprised of a React front end hosted on Netlify with express API routing and postgreSQL database hosted on Heroku. We worked using agile methods utilising pair programming. We planned our MVP using Figma to create low-fi wireframes, once it was reached we continued to iterate upon it. Trello was used to create tickets for tasks and track bugs/issues. Tackling this project gave me the opportunity to use the skills picked up during the bootcamp.

SOFT SKILLS

PROBLEM SOLVING
TEAMWORK
COMMUNICATION
CREATIVITY
ACCOUNTABILITY

EDUCATION

PHARMACOLOGY BSC

UNIVERSITY OF
LIVERPOOL

LOCATION

BIRMINGHAM, UK

ASSEMBLY OPERATIVE

Grupo Antolin/ JLR / Droitwich / March 2021 – November 2021

- Assembling various parts and components to create part of JLR vehicles.
- Build up components and sub-assemblies into finished electrical or mechanical components.
- Set and operate hand controlled or computer controlled machines.
- Monitor the production process and carry out basic testing and quality checks.
- Working to production targets

PROPERTY MANAGER / PROJECT MANAGER

Allotei Property, Self-Employed / Birmingham / January 2013 – March 2021

- Identify and pursue property development opportunities through networking and advertising.

- Conduct in-depth research into the real estate market, feasibility studies and due diligence prior to acquisition of properties.

- Management of project work including overseeing of subcontractors, scope of works and third party authorities.
